» PROJECTS

Route 101 2019
I developed a Pokémon based game on collecting Pikachu's favorites, using Game Maker Studio 2 including, character movement, sprites, functions, actions, time limits and more throughout the project in conjunction with a technical manual on how to create the game.

MangoHacks Hackathon 2019
I developed a 2D game using Game Maker Studio 2 catered to satisfying other's requests. Learned engines' own language called Game Maker Language and I established code for character movement/interaction, design and landscape of project.

Global Game Jam 2019
Creation of 2D indie platformer using Unity in C#. I developed a mini-game portion to attend with the major elements of the full game and wrote concepts of storyline to accompany the theme of this years' Game Jam, "Home".

ShellHacks Hackathon 2018
Creation of interactive visual novel using Renpy, I developed a story based on psychological viewpoints and wrote the conditions of effects in Python throughout, based on choices user interacted with and setup of project interface.
